So how does it feel knowing you ratted out a church for being open for a bogus virus? You infringed on the constitutional rights of your fellow citizens for that...

Just so you know, churches and freedom of religion is a bit higher than a governor. They are natural rights that government has a duty to uphold per our constitution. A dumb virus doesn't Trump that.

Hi Robert Davies!!

"The church has held regular Sunday services since the start of the outbreak. On April 19, it held both morning and evening services. At least ten cars, many carrying multiple occupants, drove to and parked at the church during both services."
